

# Sensitivity of core results to Rousseau et al. KS-window catalogue

Green p-value cells are significant at 0.05; red cells are not significant. The final column flags whether the significance decision is unchanged.

| Event  | Test                                     | 0.4-4 kyr     | 0.6-4 kyr     | Same decision |
|--------|------------------------------------------|---------------|---------------|---------------|
| Strong | Rayleigh: precession phase               | 0.0019 (sig)  | 0.0010 (sig)  | yes           |
| Strong | Predictive: climate-state vs EP baseline | 0.0010 (sig)  | 0.0017 (sig)  | yes           |
| Strong | Predictive: phase vs climate-state       | 5.1e-05 (sig) | 8.7e-06 (sig) | yes           |
| Strong | Predictive: full model vs -LR04          | 0.072 (n.s.)  | 0.047 (sig)   | no            |
| Strong | Predictive: full model vs -CO2           | 0.331 (n.s.)  | 0.401 (n.s.)  | yes           |
| Strong | Predictive: full model vs EP baseline    | 9.5e-07 (sig) | 2.8e-07 (sig) | yes           |
| Weak   | Rayleigh: precession phase               | 0.0027 (sig)  | 0.0013 (sig)  | yes           |
| Weak   | Predictive: climate-state vs EP baseline | 1.9e-05 (sig) | 0.0004 (sig)  | yes           |
| Weak   | Predictive: phase vs climate-state       | 0.0007 (sig)  | 0.0003 (sig)  | yes           |
| Weak   | Predictive: full model vs -LR04          | 0.665 (n.s.)  | 0.903 (n.s.)  | yes           |
| Weak   | Predictive: full model vs -CO2           | 0.012 (sig)   | 0.022 (sig)   | yes           |
| Weak   | Predictive: full model vs EP baseline    | 2.5e-07 (sig) | 2.1e-06 (sig) | yes           |
